- Content Writing
- Software Project Management
- Software Testing
- Software Requirements & Specifications Gathering
- Human Resource and Finance Management
- Accountant

Projects and Work Experience

• Projects

All my projects as a developer are on my GitHub account. I am briefly mentioning some of them here.

Skill-Bridge Project – Full Stack Developer

<https://github.com/Ashir-FabTechSol/skill-bridge>

Developed a skill-matching platform, handling both front-end and back-end development. Built user authentication, skill assessment features, and matching algorithms using Django. Integrated a responsive user interface with modern HTML, CSS, Bootstrap and JavaScript frameworks and ensured database optimization with PostgreSQL for efficient data handling. Collaborated with a cross-functional team to enhance platform scalability and ensure smooth deployment with Docker and Kubernetes.

Consumer-Circle E-Commerce Website – Full Stack Developer

<https://github.com/Ashir-FabTechSol/consumer-circle>

Developed a comprehensive e-commerce platform, handling both front-end and back-end development. Designed and implemented features like user accounts, product listings, shopping carts, and payment systems using Django for the backend and modern HTML, CSS, Bootstrap and JavaScript frameworks for the front-end. Integrated secure payment gateways, optimized database performance, and ensured a responsive, user-friendly interface.

Invoice-Software Project – Full Stack Developer

<https://github.com/Ashir-FabTechSol/invoice-project>

Led the development of a full-featured invoicing platform, managing both front-end and back-end tasks. Utilized Django for backend development, implementing key features like automated invoice generation, payment tracking, and client management. Developed the front-end using modern HTML, CSS, Bootstrap and JavaScript frameworks to ensure a responsive and user-friendly interface. Integrated secure payment processing and optimized database performance with MySQL.

Work Experience

Senior Software Engineer, Project Manager, Accountant, and HR Manager

Led software development projects, ensuring timely delivery and alignment with client requirements. Managed financial operations, including budgeting, accounting, and financial reporting. Oversaw HR functions such as recruitment, onboarding, and performance management, fostering a productive workplace. Implemented processes to enhance team collaboration and operational efficiency across all departments.
