- Deep Learning (DL)
- MVC/MVT Developer
- Software Project Management
- Software Testing
- Software Requirements & Specifications Gathering
- Human Resource and Finance Management
- Accountant

Projects and Work Experience

- ## Projects

All my projects as a developer are on my GitHub account. I am briefly mentioning some of them here.

Cosmetics E-Commerce Website – Full Stack Developer (Live)
https://stage.institut-bellarte.ch/

Led the development of a full-featured invoicing platform, managing both front-end and back-end tasks.

Skill-Bridge Project – Full Stack Developer (GitHub)
https://github.com/Ashir-FabTechSol/skill-bridge

Developed a skill-matching platform, handling both front-end and back-end development. Built user authentication, skill assessment features, and matching algorithms using Django. Integrated a responsive user interface with modern HTML, CSS, Bootstrap and JavaScript frameworks and ensured database optimization with PostgreSQL for efficient data handling. Collaborated with a cross-functional team to enhance platform scalability and ensure smooth deployment with Docker and Kubernetes.

Consumer-Circle E-Commerce Website – Full Stack Developer (GitHub)
https://github.com/Ashir-FabTechSol/consumer-circle

Developed a comprehensive e-commerce platform, handling both front-end and back-end development. Designed and implemented features like user accounts, product listings, shopping carts, and payment systems using Django for the backend. Integrated secure payment gateways, optimized database performance, and ensured a responsive, user-friendly interface.

Invoice-Software Project – Full Stack Developer (GitHub)
https://github.com/Ashir-FabTechSol/invoice-project

Led the development of a full-featured invoicing platform, managing both front-end and back-end tasks.

Work Experience

Senior Software Engineer, AI Engineer, Full Stack Developer

Led software development projects and Artificial Intelligence (AI) Solutions ensuring timely delivery and alignment with client requirements. Managed financial operations, including budgeting, accounting, and financial reporting. Oversaw HR functions such as recruitment, onboarding, and performance management, fostering a productive workplace. Implemented processes to enhance team collaboration and operational efficiency across all departments.
